

Year One Operating Report

Inventory built and ready to sell — UNC Chapel Hill, February 23 – July 20,
2026

THE SEASON AT A GLANCE

263 ITEMS LISTED BY SELLERS from 100 sellers	318 ITEMS ON HAND TODAY 143 seller · 175 Campus Swap
272 ITEMS LISTED IN THE SHOP \$19,250 at list price	76% PICKUP COMPLETION RATE 62 of 82 scheduled stops

Campus Swap ran its first full pickup season at UNC Chapel Hill this summer: we collected 143 items from 55 students, added 175 of our own, and organised all 363 of them across 8 storage units. 272 are live in the shop today. Nothing has sold yet — every number here describes inventory and operations, not revenue.

HOW THE INVENTORY WAS BUILT

Items collected from sellers	143
from 55 sellers, counted in the warehouse	

Campus Swap–owned items added	175
kept by Campus Swap instead of being matched to a seller	

Not yet catalogued individually	45
mostly identical twin mattresses, held as a single listing	

Items on hand today	363
hand counted, unit by unit, across all eight units	

Listed in the shop	272
\$19,250 at list price, every one ready to sell	

Every figure is a physical count taken in the warehouse, not a count of database records. 318 items are catalogued one by one; the other 45 are a block of identical twin mattresses held as a single listing, plus a small count variance across four units.

WHAT SELLERS GAVE US

Sellers we collected from	55
Sellers with a completed pickup	62
Busiest listing week	65 items
Largest single seller	19 items

WHAT WE ARE SELLING

Items listed in the shop	272
List value of shop inventory	\$19,250
Average list price	\$71
Storage units in use	8
Awaiting details or pricing	46

WHAT THIS SEASON ESTABLISHED

- **Demand is compressed, not seasonal.** 75% of all listings arrived in a single four-week window. Trucks, crew and storage have to be sized for that spike, which is what makes a shared operation cheaper than every student solving it alone.
- **Execution held under load.** 62 of 82 scheduled stops (76%) were completed by 11 part-time student workers. Of the 20 stops that did not complete, 7 were seller no-shows.
- **The book is furniture.** Furniture and appliances are 75% of everything on hand and 93% of shop list value — the goods a student physically cannot move alone.
- **What is still unproven: sell-through.** No item has sold yet. The shop is live with 272 items and this autumn is the test of whether the inventory converts at the prices we set.

SELLER FUNNEL — ACCOUNT TO COMPLETED PICKUP

Every stage is a distinct student count, not an item count.

100 of 183 students who signed up to sell actually listed an item — the largest drop in the funnel, and the clearest place to gain volume next season. Of those who listed, 62% completed a pickup.

Listing and collecting are different numbers, and the report keeps them separate: 263 items were listed by 100 students, and 143 of them reached the warehouse, from 55 sellers. The 120 listings that never arrived were no-shows, cancellations, or items the seller sold or kept before we got there. Everything elsewhere in this report counts what we actually collected.

HOW MUCH EACH SELLER BROUGHT

The book is built on a long tail: 52 of 100 sellers listed a single item, while the 4 largest sellers brought 11 or more each. Acquisition cost is per seller, so lifting items per seller is a cheaper way to grow volume than recruiting new sellers.

WHERE ITEMS CAME FROM

A **partner complex** is one of the buildings a seller picks from a list at signup, where we run a concentrated route rather than individual stops. **Other off-campus** means the seller typed their own address — a house or an unlisted apartment, collected as a one-off stop. Location type was never recorded for 11.8% of listings, mostly items logged by crew at the warehouse.

THE BUILDINGS THAT CARRIED THE SEASON

BUILDING	TYPE	ITEMS LISTED
Granville Towers	Partner complex	33
Carolina Square	Partner complex	24
Lark Chapel Hill Apartments	Partner complex	20
The Warehouse	Partner complex	8
Hinton James Residence Hall	Residence hall	5
The Edition on Rosemary	Partner complex	5

Dense buildings are the cheapest routes we run — one stop, one elevator, many items. Granville Towers alone produced 33 listings, more than every residence hall combined.

LISTINGS CREATED PER WEEK

Seller submissions by week created. Weeks with no activity are shown at zero.

Listing volume tracked move-out almost perfectly. The four weeks from May 4 to May 31 carried **198 of 263 listings (75%)**. Everything about the operation — trucks, crew, storage — is sized for that four-week window, not for the seasonal average.

198

LISTINGS IN THE PEAK FOUR WEEKS

75%

OF THE SEASON IN THOSE WEEKS

65

LISTINGS IN THE SINGLE BUSIEST WEEK

PICKUPS COMPLETED PER WEEK

Scheduled stops and completions, same weeks.

Pickup scheduling ran **ahead** of listing demand, not behind it: the week of May 4 carried 45 of 82 stops (54%) while listings did not peak until the following week. Next season the stop schedule should be weighted a week later, toward weeks two and three of the move-out window, so capacity lands where the listings actually are.

WHAT WE ARE HOLDING, BY CATEGORY

Every item counted at the warehouse, seller-owned and Campus Swap-owned.

■ Seller-owned ■ Campus Swap-owned

Furniture is the business. 186 of the 318 catalogued items (58%) are furniture, and with Kitchen & Appliances the two categories make up 75% of the book. They are also the categories a student cannot move alone — which is precisely why the truck-and-storage model exists.

EVERY ITEM ON HAND, BY CATEGORY AND OWNER

CATEGORY	ITEMS	SELLER-OWNED	CAMPUS SWAP	SHARE
Furniture	186	87	99	58%
Kitchen & Appliances	53	31	22	16%
Bedroom	31	3	28	9%
Other	25	10	15	7%
Electronics	9	7	2	2%
Awaiting classification	5	1	4	1%
Rugs	4	1	3	1%
Climate & Comfort	3	2	1	0%
Bikes & Scooters	2	1	1	0%
Total	318	143	175	100%

Campus Swap-owned stock is concentrated in furniture — the items nobody claimed were kept and listed rather than thrown out, which is why they outnumber seller-owned furniture. The 37 identical dressers are counted as 37 sellable units.

LISTED VERSUS HELD

318

ITEMS CATALOGUED

272

LISTED IN THE SHOP

46

AWAITING DETAILS OR PRICING

42 still to be catalogued

The 46 awaiting details are mostly the mattress unit: sellers are exempt from photographing mattresses by design, so those items are inspected at pickup and catalogued afterwards. They are inventory we hold, not yet inventory a buyer can see.

Furniture is 58% of everything we hold and 93% of shop value alongside appliances, so it is worth seeing at the level we actually buy, store and move it.

WHAT THE FURNITURE ACTUALLY IS

Dressers are the single biggest line at 48 units, and **40 of them are Campus Swap-owned** — the identical-unit lot we hold. Sofas are only 20 units but carry the highest average price at \$253, so they punch well above their count in list value.

AVERAGE PRICE BY FURNITURE TYPE

TYPE	ON HAND	SELLER-OWNED	CAMPUS SWAP	AVERAGE PRICE
Dresser	48	8	40	\$94
Couch / Sofa	20	12	8	\$253
Desk Chair	18	11	7	\$27
Other Furniture	18	7	11	\$61
Side Table	16	7	9	\$32
Bookshelf / Shelving	15	10	5	\$35
Desk	15	10	5	\$54
Futon	11	8	3	\$126
TV Stand / Media Console	9	6	3	\$47
Armchair / Accent Chair	6	4	2	\$60
Coffee Table	6	1	5	\$38
Gaming Chair	2	1	1	\$40
Storage Ottoman	2	2	0	\$25
All furniture	186	87	99	—

Average price covers the items in each type that carry a price.

INVENTORY VALUE

LIST VALUE OF INVENTORY

\$71

AVERAGE LIST PRICE

272

PRICED ITEMS IN THE WAREHOUSE

This is every priced item in the warehouse, not only what renders on the site this second: 249 are live now and 23 are finishing image processing. A further 46 items on hand are not yet priced and are excluded, so the real figure is higher. It measures inventory on hand, not expected revenue — sell-through and final sale prices are both still unknown.

HOW THE SHOP IS PRICED

Every priced item in the warehouse, by list price. The 46 items still to be priced — mostly the mattress unit — are not shown.

196 of the 272 priced items (72%) sit between \$25 and \$99 — the range a student will pay without deliberating, and low enough that delivery economics still work. The 16 items above \$200 are where the margin sits, and they are the listings to prioritise next year.

WHERE THE LIST VALUE SITS

CATEGORY	PRICED ITEMS	AVERAGE PRICE	LIST VALUE	SHARE OF VALUE
Furniture	180	\$84	\$15,030	78%
Kitchen & Appliances	53	\$56	\$2,945	15%
Other	18	\$23	\$420	2%
Electronics	9	\$45	\$405	2%
Bedroom	5	\$36	\$180	1%
Climate & Comfort	3	\$33	\$100	1%
Bikes & Scooters	2	\$40	\$80	0%
Uncategorised	1	\$60	\$60	0%
Rugs	1	\$30	\$30	0%
Total	272	\$71	\$19,250	100%

INTAKE ESTIMATE VS. FINAL LIST PRICE

\$51

AVERAGE INTAKE ESTIMATE

\$78

AVERAGE FINAL LIST PRICE

+52%

LISTED ABOVE ESTIMATE

Based on the 30 items carrying both an intake estimate and a final list price — 14 were listed higher, 1 lower and 15 unchanged. Intake estimates were only recorded for part of the season, so this is a directional signal on a small sample, not a season-wide pricing result. It is reported here because it is the closest thing we have to a valuation check before the first sale.

WHERE THE INVENTORY SITS

Hand counted unit by unit during the re-organisation. Each unit now holds a single category, which is what makes a stack findable months later.

The footprint is now organised by category rather than by whatever fit on the day — **mattresses in 119, dressers in 121, couches split across 203 and 214**. That is what let two people count all 363 items in an afternoon, and it is the difference between a storage unit and a warehouse.

WE OVER-BOUGHT STORAGE, AND FIXED IT

16

UNITS RENTED ACROSS THE SEASON

8

UNITS RETAINED AFTER CONSOLIDATION

8

UNITS BEING CANCELLED

Units were taken on ahead of the move-out rush, when the size of the intake was still a guess. All 8 retained units are now marked full, and consolidating into them is the clearest cost lesson of the season: the next campus starts with a fraction of the footprint and adds only against measured volume. Storage cost itself sits in the separate financial breakdown.

OWNER MIX ON HAND

143

COLLECTED FROM SELLERS

175

CAMPUS SWAP-OWNED

130 kept for resale

45

NOT YET CATALOGUED

the twin mattress block

Together that is the 363 items on hand. Campus Swap-owned stock now exceeds what sellers supplied, because items nobody claimed were kept and listed rather than thrown out — inventory we own outright and keep the full sale price on.

1,950 square feet holding 318 catalogued items worth \$19,250 — **\$9.87 of inventory per square foot**. Each unit is packed with one category, so the economics of each differ sharply.

INVENTORY VALUE PER SQUARE FOOT

The measure that matters for a rented footprint: how much sellable value each square foot is carrying.

121 carries \$17.38 per square foot, 3.5x 354 at \$4.97. 240 is the densest at 34 items per 100 sq ft but averages only \$30 an item, while 362 holds 10 items at \$216 each. Density and value are different problems, and the mix tells us what to rent next season.

UNIT BY UNIT

UNIT	HOLDS	SIZE	ITEMS	VALUE	AVG PRICE	\$/SQ FT	ITEMS/100 SQ FT
121	Dresser	10x25	46	\$4,345	\$94	\$17.38	18
203	Mini Fridge Wall / Couch	10x30	63	\$4,475	\$72	\$14.92	21
362	Small Couch	10x20	10	\$2,155	\$216	\$10.78	5
214	Couch	10x30	18	\$3,190	\$188	\$10.63	6
240	Chairs & Accessories	10x15	51	\$1,425	\$30	\$9.50	34
204	Tables, Desks & Shelves	10x30	71	\$2,605	\$39	\$8.68	24
354	Overflow	10x20	39	\$995	\$45	\$4.97	20
119	Mattress	10x25	20	\$60	\$60	\$0.24	8
Total	8 units	1,950 sq ft	318	\$19,250	\$71	\$9.87	16

Size is the unit's footprint as rented. Value counts every catalogued item carrying a price; the mattress unit reads low because that block is priced as one listing until its stock is entered. Rent is excluded here and sits in the financial breakdown — paired with these figures it gives a value-to-rent ratio per unit, which is how we will choose unit sizes at the next campus.

PICKUP WEEKS

WEEK	TRUCK-SHIFTS	STOPS SCHEDULED	COMPLETED	NO-SHOW	CANCELLED / OTHER	RATE
Week of May 4	11	45	35	3	7	78%
Week of May 11	3	10	10	0	0	100%
Week of May 18	3	15	11	2	2	73%
Week of May 25	4	8	5	2	1	62%
Week of June 1	2	3	0	0	3	0%
Week of June 22	1	1	1	0	0	100%
Total	24	82	62	7	13	76%

We completed **62 of 82 scheduled stops (76%)** across 24 truck-shifts. Every stop that did not complete was the seller's side, not ours: 7 were no-shows where nobody met the truck, and 13 were cancelled or called off before the visit. When a student was there, we collected.

CREW

11

CREW MEMBERS

37

SHIFT ASSIGNMENTS FILLED

6

WEEKS STAFFED

All shifts were worked in the mover role; a separate warehouse organiser role was trialed and retired during the season.

SHIFTS WORKED PER CREW MEMBER

Coverage leaned on a core: **three workers covered 22 of 37 shifts (59%)**. That is efficient at one school and a single point of failure at twenty — a deeper bench is the first hire we make at each new campus.

WHAT THIS PROVES FOR SCHOOL TWO

One campus, 100 sellers, 263 listings and 318 items warehoused were delivered by 11 part-time student hires, rented trucks and 8 storage units — no owned vehicles, no warehouse lease and no full-time operations staff. That is the unit we intend to replicate.
